Student Name	Pulibanti Tejavani
Project Name	Metro Ticket Generating System
Maximum Marks	

Brainstorm & Idea Prioritization

The brainstorming process focuses on developing a convenient digital metro ticketing solution using ServiceNow. The proposed ideas cover ticket booking, station selection, automated fare calculation, digital QR-ticket generation, portal usability, security, and future system enhancements..

Idea Group	Priority
Metro ticket booking service	High
Station and destination management	High
Automatic fare calculation	High
Digital QR ticket generation	High
Service Portal interface	High
Payment mode handling	High
Automated workflow	Medium
Access control and security	Medium
Future analytics and notifications	Low

Brainstorming & Idea Prioritization

Metro ticket booking service	High
Station and destination management	High
Automatic fare calculation	High
Digital QR ticket generation	High
Service Portal interface	High
Payment mode handling	High
Automated workflow	Medium
Access control and security	Medium
Future analytics and notifications	Low

Priority distribution: 6 High, 2 Medium, 1 Low
